# SmartOne 365

→ 4" FULL GLASS MULTI-TOUCHSCREEN  
84\*84\*14 mm (320\*320 px)

## Smart heating & cooling

When connecting more SmartOne 365 together, each room is managed to one system "as a whole" to increase comfort level and minimize energy needs.

## App & cloud platform

Each SmartOne 365 thermostat can connect to Smart365 cloud platform and benefit from additional features and services.

## Smart hub

Easily replace the old thermostat controlling the boiler. For multi-room control, add compatible radio-controlled thermostatic radiator valves.

### Find out the right solution for every situation and usecase:

- Wireless or wired solution
- Control single or multiple zones
- Control underfloor heating & radiators
- Direct connection to the boiler
- Control dehumidifiers

HEATING (UFH + RADIATOR)

HEATING (UFH 2 ZONES)

HEATING & COOLING

MULTIROOM

## App

The smartphone app gives you full control over your system wherever you are.

### OPTIMUM START & STOP

Common thermostats control room temperature by following the scheduling defined by the user. As they do not account for time needed to heat up or cool down, especially in case of radiant systems, they may lead to comfort problems and energy losses. Optimum Start & Stop takes care of this by adjusting the start and stop of each room in the system, based on real room behaviour, thus maximizing comfort and saving energy.

### PID STRATEGY

### MASTER ROOM DETECTION

### SELF-ADJUSTING CLIMATIC CURVE

### WEATHER FORECAST

### ADVANCED AIR TREATMENT

### NEW APP (IOS + ANDROID) AND CLOUD PLATFORM

### ENERGY SAVING AND COMFORT LIVING MODE

The user can set the most suitable operating mode according to the type of environment, with an eye to consumption or push the system to maximum comfort.

energy saving ————— comfort living

### ERROR-FREE ASSISTED INSTALLATION

Installation available from displays and apps. Internet connection not required.

### AUTOMATIC REMOTE UPDATE

### WIFI AND BUS CONNECTION

### MANAGEMENT OF 4 PIPE SYSTEMS

### INTEGRATION WITH HOME AUTOMATION THROUGH STANDARD PROTOCOLS (KNX CONVERTER OPTIONAL)

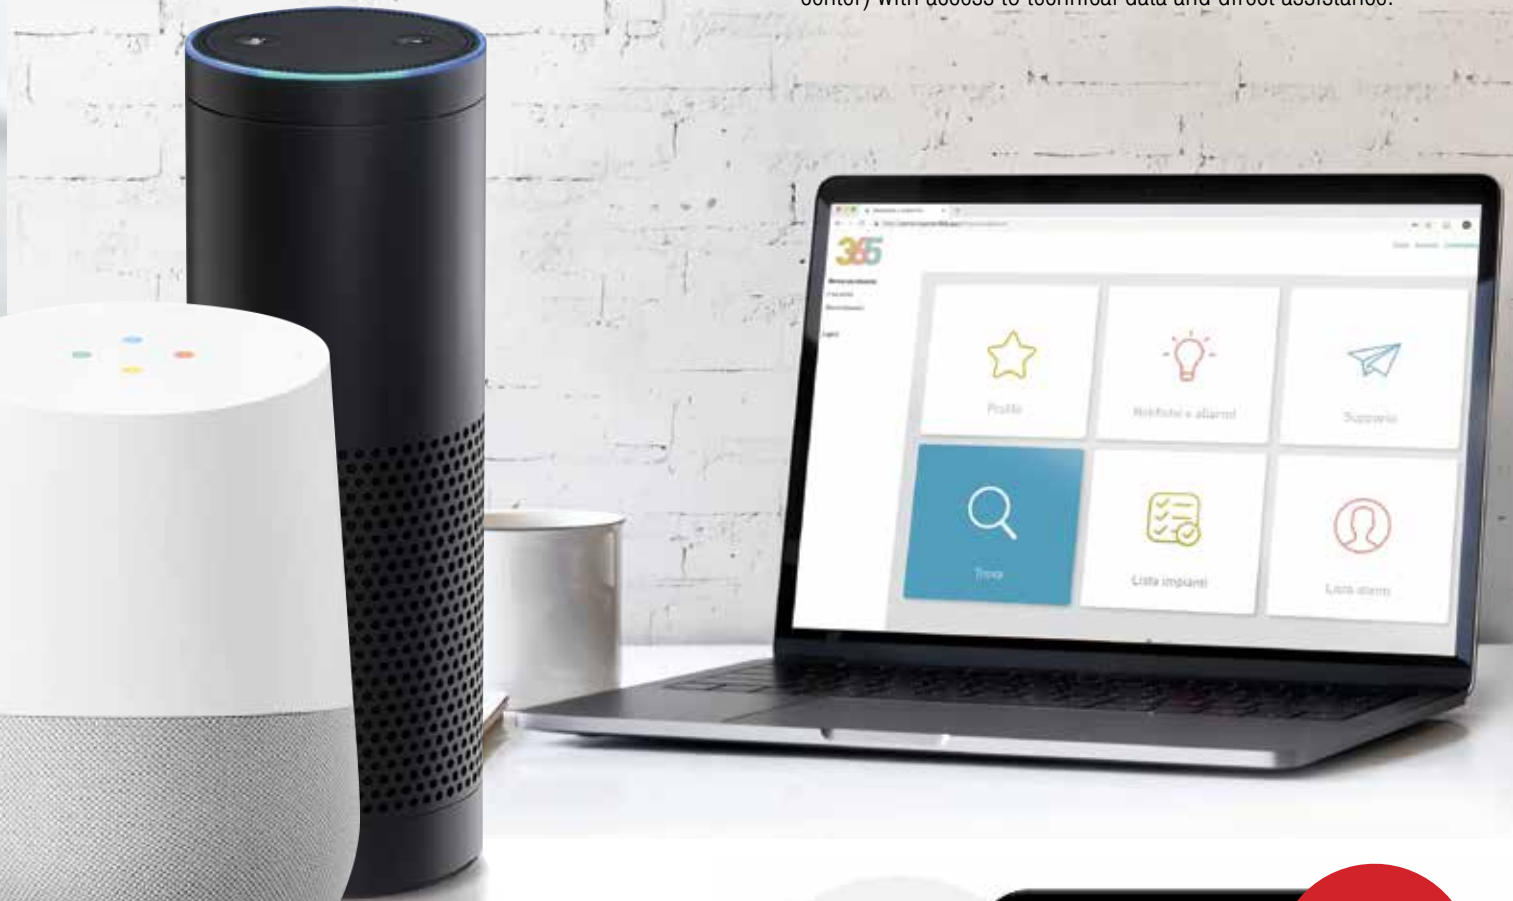

## Smart home integration

Using Smart365 with Amazon Alexa or Google home means you can now effortlessly control your comfort with your voice.

## Web portal

The web portal allows the management of the user account, for the visualization of graphs and data, download of guides and manuals, assistance, after-market services, contacts and messaging. The web portal can also be used by specialized personnel (installer, service center) with access to technical data and direct assistance.

## Make the invisible visible.

**NFC technology:** all SmartPoint sensors are equipped with an NFC Tag. With a simple click on your smartphone, you can see the temperature set in that room and change it.

## Geofencing

Never heat up your empty home. Save energy when nobody is home and let pre-warm the house before you arrive home.
